Auto Ticket Classification using FLOW DESIGNER

Project Demonstration Phase

Team Leader: K. Prasanna | Members: R. Nithisa Shirin, S. Nigmatha Nisha, Misha Nandhini N.

• Purpose: present the completed Auto Ticket Classification using Flow Designer project.

• Introduction: project title, K. Prasanna and members R. Nithisa Shirin, S. Nigmatha Nisha and Misha Nandhini N.

• Problem: manual classification takes time and delays routing.

• Solution: caller enters basic information; Flow Designer checks keywords; Category/Subcategory update; email confirmation.

Auto Ticket Classification using FLOW DESIGNER

Project Demonstration Phase – Continued

• Demo: open form, enter Caller and Short Description, submit, show Flow execution, show classification and email.

• Demonstrate Wi-Fi, Projector, Password and Slow/Hanging cases.

• Show unmatched/fallback behavior if included in testing.

• Recording checklist: clear screen, audible voice-over, purpose, benefits, working process and final output.

• Submission checklist: eight PDFs, project files, demonstration recording and required links/permissions.

• Outcome: evaluator can see the complete working process.
